Subject: handling of negative values and precision
Attachments: Blaze King 20.2-AF_CK_SC-0142WS013E-Non-CBI-Report-12.21.17 (1).pdf

Hi Stef, attached to this email is a sample of a stove report where every run had negative values. Filter weights and calculations can be found on pages 40, 55, 68, 90, 107, 120 and 130. Can you please review and let me know if these values were handled appropriately? Can you also please review page 69 values and let me know how it might be possible that these values met dual train precision requirements? Thanks!

Lisa
